

USER MANUAL

Flakelovers by Wolfgang Mock

Electric Flaker

**ORDER YOURS AT
DELIVERDELI.COM**

Firstly, please read the operating instructions before using your Flakelover. This will protect you and prevent damage.

Flake  **lovers**
by Wolfgang Mock

Make your oatmeal fresh!

This way you treat yourself to the best of oats and other grains.
Fresh flakes taste better.

By the way, the material of the housing of the Flakelover is made of renewable plant components by the company Tecnarö. (www.Tecnarö.de)

Dear customer

I am very pleased that you have purchased a Flakelover electric flaker and welcome you to the world of fresh grains. Those who flake freshly enjoy the variety, great taste and the full aroma of the whole grains.

It's so easy to make fresh flakes. Try your Flakelover right now and enjoy a tasty and healthy meal. I wish you a healthy appetite and a lot of pleasure with your Flakelover. I can't wait to your feedback.

Glad to have you with us!

Wolfgang Mock

SHORT INSTRUCTIONS

Before the first use:

Flake 2 tablespoons of oats and then discard the flakes. This will remove any possible dirt from the fabrication process from the surface of the stainless-steel rollers.

Start-up

1. Plug the power cord into the device and then into the electric socket
2. Place a bowl under the outlet for the flakes.
3. Fill the desired material into the hopper, e.g., naked oats from organic farming.
4. Switch on the device. Switch off after flaking.

PRECAUTIONS AND SAFETY INSTRUCTIONS

Please carefully read the user manual before using your Flakelover for the first time. When selecting grains to be flaked, purchase only cleaned grains. Preferably from organic cultivation. You can flake oats without any special preparation. You can use spelt, barley, wheat, rye, for example, it makes sense to briefly moisten the grains in a sieve and then let them dry on a cloth for a while. The grains will absorb a little water and you will get nicer flakes. However, you can also flake without wetting. You should clean the stainless-steel rollers whenever you flake dry grains.

You can also „flake“ spices.

After flaking spices, you should flake a small amount of grain e.g., to clean the stainless-steel rollers from residue. If you don't, your next flakes may taste „seasoned“.

Oilseeds can also be flaked, such as sunflower seeds.

The electric flaker is an electrical appliance and should only be operated under supervision (and never by children alone).

Warning

Never touch the rollers or insert objects (such as spoons, screwdrivers, etc.). Failure to do so may result in injury (e.g., injury to fingers) as well as damage to the stainless-steel rollers.

Cleaning

The unit must never be immersed in water or other liquids. For cleaning, only wipe the outside of the housing with a very light damp cloth. No water should enter the flaker.

You can remove the flaking unit and clean it under running water. See the video on www.mockbake.com/videos

The funnel can be loosened with the small black lever. If you have lifted off the black funnel - the upper part - for this purpose, the unit cannot start. A limit switch - micro-switch - immediately interrupts the power supply to the motor.

TECHNICAL DATA AND SCOPE OF DELIVERY

Type Electric Flaker „Flakelovers

120-230 VAC | 0.5-1 A | 50-60Hz | 120VA

Height: 292 mm | Width:120 mm | Depth: 220 mm

Motor: DC motor with gearbox

Motor speed: 115 rpm

Weight: 3kg / 6 lbs 6 oz

Hopper filling capacity (oats): 150 g

Flaking quantity/min: approx. 60 g

Flaker rollers: stainless-steel

Housing material: made of renewable plants

Power cord, Manual

Technical changes reserved.

WARRANTY AND REPAIR

Mockbake GmbH warrants the Flakelover against defects in material and workmanship for a period of 3 years (**warranty excluded for commercial use**) from the date of purchase. Please keep your proof of purchase for this case.

The warranty does not cover damage to fragile parts, e.g., the hopper, or for damage caused by misuse after commissioning. Within the warranty period, the defective unit will be repaired or replaced. If a repair is needed, please send us an e-mail with your contact details to info@mockbake.com.

We will then contact you to resolve the problem.

TRANSPORT PACKAGING AND DISPOSAL

Transport packing

The packaging protects the Flakelover from damage during transport. Please keep the original packaging to transport the device safely later.

Disposal of the old device:

Applies only to the European Union and countries with recycling systems. This symbol on the products, packaging and/or accompanying documents means that used electrical and electronic products and batteries must not be disposed of with general household waste. Please take old products to the appropriate collection points for treatment, refurbishment, or recycling in accordance with the legal requirements.

By properly disposing of these products, you will help protect valuable resources and avoid any potential negative impact on human health and the environment. For more information on collection and recycling, please contact your local waste management service provider. In accordance with state regulations, fines may be imposed for improper disposal of this waste. Do not put the Flakelover in your household waste under any circumstances. Instead, use the official, established collection and return points for the delivery and recycling of electrical and electronic equipment at the municipality, dealer or Mockbake GmbH. Please ensure that your old device is stored in a child-proof manner until it is taken away.

DO YOU HAVE ANY QUESTIONS?

Do you have a have questions about how the Flakelover works, or do you have a problem? Please contact us via ***info@mockbake.com***.

Almost any problem can be resolved.
