SAMUEL GROVES & CO., LTD., MUSGRAVE ROAD, BIRMINGHAM 18

Samuel Groves

England 1817

SAMUEL GROVES 1817 - PRESENT

Few suppliers of hospitality products go back as far as Samuel Groves. This venerable Birmingham-based manufacturer of kitchen equipment started in 1817, initially making brass candlesticks. By the 1870s, production had expanded to electroplated teapots and trays and it started to become a significant exporter in the 1910's.

The company was started by Samuel Groves senior and was subsequently taken over by Samuel Groves junior in 1866:

The London Gazette 1866 2 February Issue 23065 Notice is hereby given, that the Partnership heretofore subsisting between Samuel Groves the elder and Samuel Groves the younger, of Broad-street Birmingham, in the County of Warwick, Britannia Metal Smiths, carrying on business under the firm of Samuel Groves and Son, has this day been dissolved by mutual consent. All debts owing to or from the said late co-partnership will be received and paid by the said Samuel Groves the younger, by whom the said business will be carried on.

Dated this 20th day of January, 1866. Samuel Groves, senr. Samuel Groves, junr.

Henry Groves was the last family owner when in 1917 Samuel Groves was registered as a Limited company. Moving to Musgrave Street, Hockley in 1921

The big take-off into catering supply came during the Second World War when Samuel Groves won a major government contract to produce aluminium trays, with many other items for the Ministry of Works and the War Office soon being added. Including the Sirius incendiary bomb shield, utilising existing serving tray tooling.

This helped reinforce the foundations of the modern business, which gained a major boost from the introduction of the Mermaid brand at the beginning of the 1950s, Molly the Mermaid had first appeared in the 1920's. The MD of the time saw a statue of a little mermaid in an antique shop and brought her back to Birmingham where she took up residence in the foyer of the factory. Her likeness has since proved an enduring logo.

The move into larger premises in Norton Street, Birmingham in 1965 enabled the company to expand its interests in cookware, bakeware, holloware and utensils.

Manufacturing operations were reinforced with the acquisition of the assets of G.W.Pearce & Co in 1995, which led to Samuel Groves becoming the original manufacturer of Agaluxe accessories for Aga Rayburn ovens and in 2002 with the acquisition of Buncher & Haseler, best known for its Longlife brand.

The purchase of Samuel Groves by U Group Ltd in 2014 was the beginning of a new chapter, with the development of new products, utilising new materials all being manufactured at U Group's premises in Yardley, Birmingham.

Samuel Groves encompasses all facets of manufacturing including Metal Cutting, Presswork, Metal Spinning, Welding, Fabrication and Injection Moulding in addition to which we are able to design and manufacture our own tooling in house.

Henry Groves 1862-1936, third generation in the family firm was listed in the 1881 census as having the occupation of Metal Spinner, a process we still use at Samuel Groves today.

Our expertise in design, manufacturing and production can be utilised to develop bespoke products using a variety of materials including aluminium, copper, stainless steel, mild steel and a range of plastics as well as numerous bonded materials. We can then finish your product using a variety of finishing

processes including Polishing, Sunraying, Hard or Soft Anodising, Powder Coating, Enamelling and Non Stick Coating.

Product innovation has not, however, been at the expense of the company's traditional manufacturing ethos, Even though the market and indeed cooking practices have evolved over the years, Samuel Groves quality and processes have remained constant. We are traditional manufacturers and every product is still hand-finished.

We have been a manufacturer in Birmingham for close to 200 years, some of the skills that will be used in the factory today will have been used all throughout those 200 years.

Global interest in British Design and Manufacturing has never been higher and we now have a golden opportunity to capitalise on this and lay the foundations for another 200 years of manufacturing in Birmingham.

Unmatched durability

A high performance three-layer non-stick coating, with a high degree of ceramic reinforcement. Outstanding durability, excellent abrasion resistance and extraordinary corrosion resistance make this system the best choice for high demanding cooks, and professional chefs.

Layers

- Hand cast with pure aluminium ingot, no added impurities.
 - Superior professional quality and extremely durable.
 - Ultimate heat retention when heated to 260°C.
 - Greater efficiency of heat conduction.
1. High quality top coat for a longlasting, maximum non-stick effect.
 2. Extraordinarily strong bonding primer for best bonding of the layers.
 3. Highly ceramic reinforced base coat, for an optimum adhesion to the substrate.
 4. Specially prepared substrate for an optimum adhesion of the coating to the cookware.
 5. Extraordinarily high wear resistance and longest durability.
- 7 mm Aluminium base.
 - Stainless steel hollow handle.
 - Diamond cut non stick Titanium coating.

Black Iron

Before the first use

Steps:

- 1, Put some potato peelings in the frying pan.
- 2, Add approximate 200 ml water.
- 3, Boil for about 20 minutes.
- 4, Empty the pan and rinse with running warm water.
- 5, Pour a thin layer of oil into the pan.
- 6, Heat the oil for a couple of minutes and after that wipe the pan clean with paper towel.

Using your black iron pan.

Heat a small amount of fat in the pan and once the pan becomes good and hot seal the food for about 45 seconds on each side before reducing the heat to complete the cooking.

Cleaning your black iron pan.

Wash with very hot water and sponge and then wipe dry.

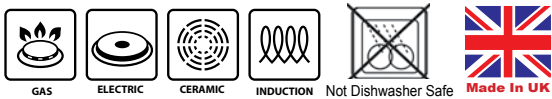

Purify the pan from time to time by cooking salt on a fast heat for approx. one minute 30 seconds and then wipe clean with paper towel. The salt will help mask the residues and the odours from previous use.

Oil with paper towel and store in a dry place.

Warning

Do not Leave the pan to soak. If food sticks to the pan use a green sponge. Never clean in a dishwasher. The pan may rust if these care and use instructions are not followed. If this happens scrub the pan with a hard brush to remove the rust. The cooking of acidic food, such as tomatoes, may produce staining. If this occurs the pan should be re-seasoned.

Black Iron

• Material spec: Black Iron 1.2 - 1.5 mm

- UK Manufactured.
- 1.2 - 1.5 mm thickness.
- Supplied coated with natural Flax Oil for protection against oxidation.
- Eco-Bio-Durable & Recyclable 100% natural.
- Riveted traditional iron bar handle.
- Ideal for sealing and browning & grilling.
- Once seasoned, the blacker it gets, the less it sticks.
- Suitable for all heating surfaces.

Why use aluminium

Samuel Groves classic aluminium bakeware is superb quality, heavy gauge extremely durable, and the professionals choice.

Aluminium is an excellent conductor of heat, which means superb heat distribution with no hot spots. Made especially for catering use, each product is available in a wide variety of sizes and comprises a hygienic, seamless design, with a satin finish. Hand wash only, not dishwasher safe. Oven safe for use in any commercial ovens.

ALUMINIUM BAKEWARE & NON STICK BAKEWARE

Aluminium – Excellent Heat Conductor

- Heavy gauge
- Extremely durable
- Manufactured for catering use
- Variety of sizes available
- Hygienic seamless design
- Not dishwasher safe – hand wash only
- Oven safe for use in any commercial ovens.

SILVER ANODISED

The smooth satin finish on Samuel Groves' Mermaid Silver Anodised range is produced using an electro-chemical process that hardens the outer layer of the aluminium, giving it an easy-release, scratch resistant surface, which is part of the metal and will therefore not peel or flake off. Aluminium is an extremely efficient heat conductor, it heats up quickly and produces a consistent even bake. Which is why it is the preferred choice of professional chefs.

Mermaid

Since 1953

HARD ANODISED

The unique dark finish on Samuel Groves' Mermaid Hard Anodised range is the by-product of an electro-chemical process that hardens the outer layer of the aluminium to produce a more durable surface. It is typically twice as hard as Stainless Steel and its surface will never peel, flake or blister. Over time, if used correctly, our Hard Anodised products will build up a Patina which will make them virtually non-stick. Aluminium is an extremely efficient heat conductor, it heats up quickly and produces a consistent even bake. Which is why it is the preferred choice of professional chefs.

Hard Anodised Aluminium

Hard Anodised Aluminium

- Twice as hard as stainless steel
- Metal utensils can be used
- Even heat distribution
- Scratch resistant
- Will never peel, flake or blister
- Hand wash only
- Oven safe to 240°C/475°F/gas mark 9
- Lifetime guarantee*

*Lifetime Guarantee for Non-Commercial use Only and on Hard Anodised items only.
See www.ugrouppltd.com for terms and conditions and for more information.

The background of the entire page is a photograph of three silver, cone-shaped heatlamps hanging from a ceiling in what appears to be a commercial kitchen. The lamps are made of a reflective metal and have a perforated top section. They are suspended by black cables. The lighting is soft, and the background is slightly blurred, showing kitchen equipment and a clean environment.

Samuel Groves
England 1817

Heatlamp

- Samuel Groves heatlamps provide consistent, flameless, radiant heat to briefly hold food warm at kitchen work areas, pickup stations or customer serving points.
- Handmade in Birmingham using high quality components all our lamps are CE rated to EN.
- For added peace of mind our lamps are rated IP3 against water ingress.
- Attractive and versatile Samuel Groves heat lamps give you exceptional flexibility towards meeting your back or front of house requirements. Available in a range of styles, colours and finishes.

Sauté

Canned Fuel

Prepare hot portions in skillets and pans with showmanship style. Canned fuel can easily be used to sauté with open grates. A convenient drawer provides easy and safe access to fuel cans and makes it ideal to use outdoors as it provides a built in windscreen.

Chafing Fuel

- Odourless while it burns!
- No alcohol smell at your buffet.
- It's safer! Non alcohol based fuel (diethylene glycol) in a sealed container.
- Adjustable wick! For just the right heat.
- From simmer to sizzle.
- Cans stay cool ,even after hours of use.
- Always easy to handle!
- The fuel will not evaporate! No need to fumble with recapping.
- Burns hours longer, reducing the need to change the fuel in the middle of the buffet.

  Factory Standard Set	Standard heat An ideal heat for most service functions. Factory set for use in chafing dishes, Simply remove the cap and light. Requires no adjustment. 9.5oz Burns up to 6 hours 4.5oz Burns up to 4 hours
  Pull up and Spread Wick	High Heat Cook food and boil water. Before lighting, grasp wick between fingers, gently pull up on wick until the wick stops. Spread the wick loops and then light. Ideal for hot pot service or where very high heat is needed.
  Push Wick Down	Low heat For low temperature food and beverage warming. Before lighting, gently grasp wick between fingers and push down. Perfect for room service and delivery boxes.

Store & Re-use

- To extinguish, blow out flame or use a metal snuffing device.
- Store for later use. The fuel will not evaporate.
- To relight, prime wick with towel or napkin, then relight. change the fuel in the middle of the buffet

Staychill™ Chill Tray

With Staychill Trays you can keep your served food cold for longer in a simple, cost efficient way. Simply place Staychill in the freezer for 4 hours and Staychill will keep food chilled for approximately 3 hours; no mess, no ice, no hassle.

Staychill™ Chill Tray

- Our Chill Trays are manufactured from 1 mm anodised aluminium plate on the exterior and EPS insulation, including refrigerant bags on the interior. Each tray comes with four rubber feet to protect any work surface.
- All materials are recyclable. To ensure a continuous and smooth usage, we recommend alternating a set of two chill trays.
- Ideal for use at point of purchase, breakfast buffets, conference rooms, outside catering events and much more.
- Available in standard gastronorm sizes for perfect and unique food presentation.
Hand wash only, not to be immersed in water.

The image shows a bakery production line. In the foreground, a metal trolley is filled with several trays of golden-brown, rectangular pastries. The trolley is part of a larger system of similar trolleys that recede into the background, creating a sense of depth. The pastries are neatly arranged on each tray. The background is slightly blurred, showing more of the bakery environment, including what appears to be a conveyor belt and other equipment. The overall lighting is bright and even.

Trolleys & Bins

Stainless Steel Trolleys

- Quality all stainless steel food service trolleys.
- Units supplied flat-packed, easy to assemble.
- All trolleys fitted with 4 castors (2 with brakes).

Slim Bins with Vents

- These Slim Bins are made of high quality materials and have a sturdy structure to prolong life.
- The slim rectangle shape is space efficient and fits tight spaces.
- Vent channels are designed for ease of lifting of a filled trash liner and less worker exertion.
- Comes with an ergonomic handle with a smooth and comfortable feel.
- Comes with four trash liner grooves for easy attachment without the need to tie knots.
- Bottom hand holds assist in emptying.
- Multiple interchangeable tops are available to fit for various applications.
- Custom imprint available.

Two container sizes with five lid options collect paper, cans and bottles as well as general waste. Lids and graphics are all in WRAP colours.

Terms & Conditions

GUARANTEE & LIABILITY Goods supplied by U Group are guaranteed in accordance with the terms of the manufacturer's warranty provided with goods or for 1 year if not stated with the goods. The warranty applies to UK mainland only. Our warranty does not apply to wear and tear, or if product has been damaged or misused. Machines returned for repair in warranty where it is found the machine has been abused or has not been used as the machine was designed for will be charged for. This also applies where a machine has not been maintained properly including cleaning and descaling where applicable. Machine returned for U GROUP repair are not reassembled if on quotation you do not require the machine repaired. Loan machines are not available. U Group accepts no liability of whatever nature arising as a result of any representations, breach of contract, late delivery of product, negligence or otherwise including but not limited to any liability for indirect or consequential loss, or loss of profits, revenue, business or goodwill except for liability for death or personal injury by U Group negligence. All conditions, warranties, guarantees and representations, express or implied, by statute, common law or otherwise in relation to the goods (other than any liability which U Group not permitted by law to exclude or restrict) are hereby excluded.

Damages and Shortages If any order is received short or damaged, notification must be received in writing within 72 hours of delivery (to allow for carrier claims).

Returns:

- 1) You will require a returns authorisation number to return any item from our catalogue. You must telephone us on 0121 764 6400 to be issued with authorisation number before returning goods.
- 2) Unrequired goods for credit will only be accepted within 10 days of invoice and must be in perfect condition and in original packing. After 10 days a 25% restocking charge will apply. No goods are accepted for return after 30 days.
- 3) Full purchase detail i.e. our order number, must be included on all returns.
- 4) All goods returned are at senders expense and responsibility.
- 5) No special items (non Stock lines) will be accepted back for credit.

Credit Terms Strictly net 30 days from the date of the invoice. U Group may charge interest at 5% above the base rate of National Westminster PLC on any amount not received by the due date.

The title of the goods will not pass to the purchaser until the goods are paid for in full.

Hazardous Goods

Certain items i.e. Butane gas canister and chaffing fuel are not available for outside of UK Mainland.

We operate a policy of continuous product development and improvement and from time to time, may alter the specification of items shown in the catalogue.

We reserve the right to change our prices without prior notification.

All orders are subject to U GROUP trading terms and no other terms including customer purchase terms apply unless expressly agreed by U GROUP in writing.

Changes Every effort is made to prevent printing errors in the catalogue. Any error will be advised at the time of ordering, so that we can proceed with corrected details and prices.

In line with the U GROUP quality policy, telephone calls may be monitored/recorded for training purposes.
